A Unified POS Technology Platform

Ordering. Booking. Loyalty. Payments

Australia's Most Feature Rich POS & Ordering Platform

We enable you to connect with the digital world

Our platform has been built by leading technologists and F&B operators.

The digital world is demanding and ever changing so it's important to keep you connected to stay ahead.

Simple, intuitive workflow allows staff to start selling immediately. Less processing time means spending more time where it matters - with the customer.

POS (Point of Sale)

In the world of ordering, what's most important is customer experience. That experience is not one size fits all.

We provide POS solutions for merchants of all sizes. From single to multi-national operators.

Our POS is the central hub for all things digital. It allows you to process face to face orders, online/QR orders and connect with delivery partners like Foodpanda.

Online & QR Ordering

We lead busy lives and work long hours and are therefore drawn to systems that save us time and energy. Coffee shops and eateries now have smaller footprints but to no surprise, orders have become more complex and larger in volume.

Zii Online & QR ordering has the ability to;

- Order ahead via URL or social media channels.
- QR Order with Online &/or Instore payment ability
- Pick up or delivery functions.
- Instant Synchronization with POS
- Manage menu via POS

Kiosks

As we look forward to a post-COVID world, one thing that has accelerated quickly, is the adoption of digital initiatives in the name of convenience, speed and more importantly, safety.

As high tech and beautiful as kiosks are, it takes a well thought out implementation plan to be successful such as, the right location, traffic flow so in-house diners aren't disrupted, where to pick up etc.

Get in touch with Zii to find out how Kiosks can help you drive more orders.

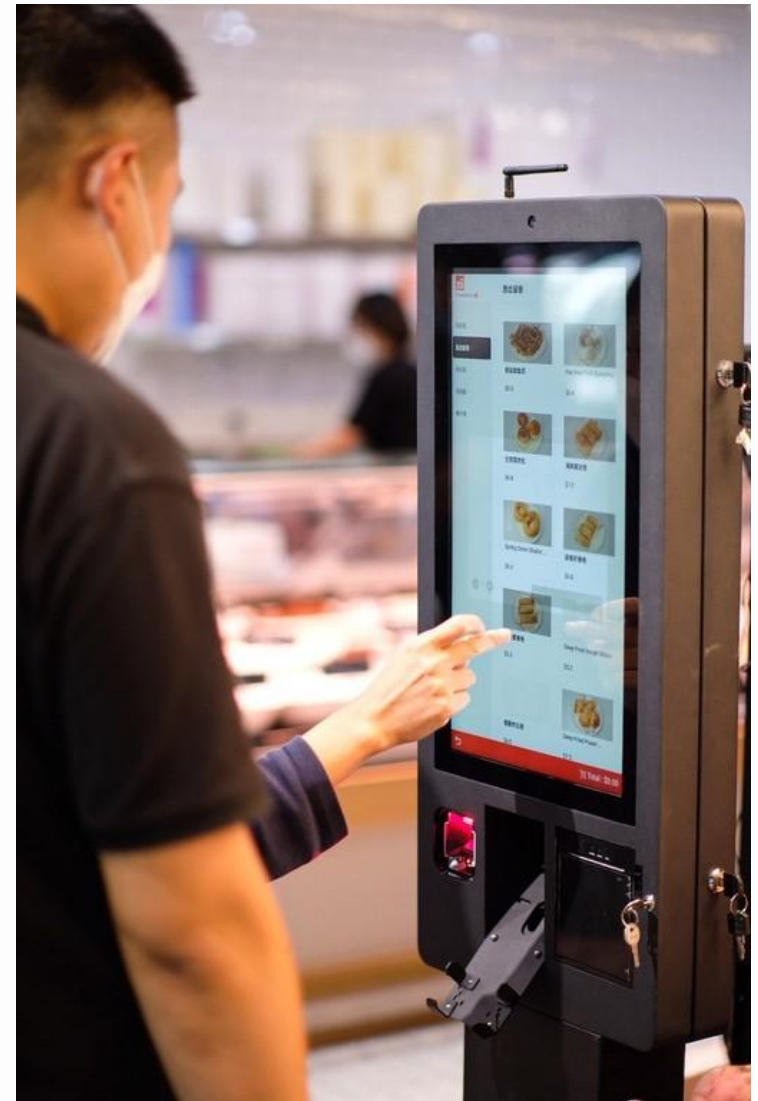

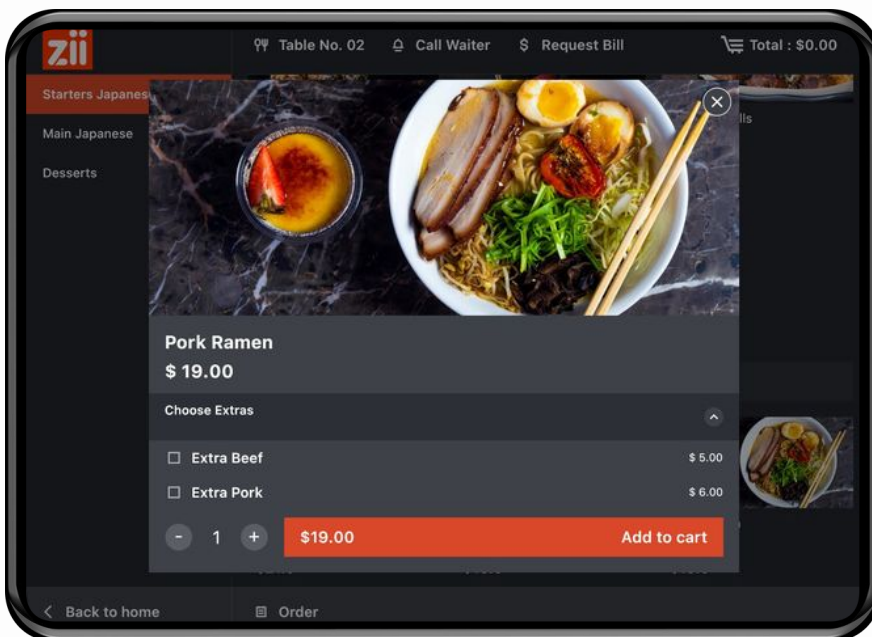

Table Ordering (ZiiTO)

User experience and visualization has become extremely important in recent times. With our Table ordering module, diners can order at the comfort of their own table without any fuss.

Benefits of Table Ordering include;

- Proven increase average ticket size
- Sync to current printers.
- Reduce staff on shift
- Call waiter function
- Dining time restrictions

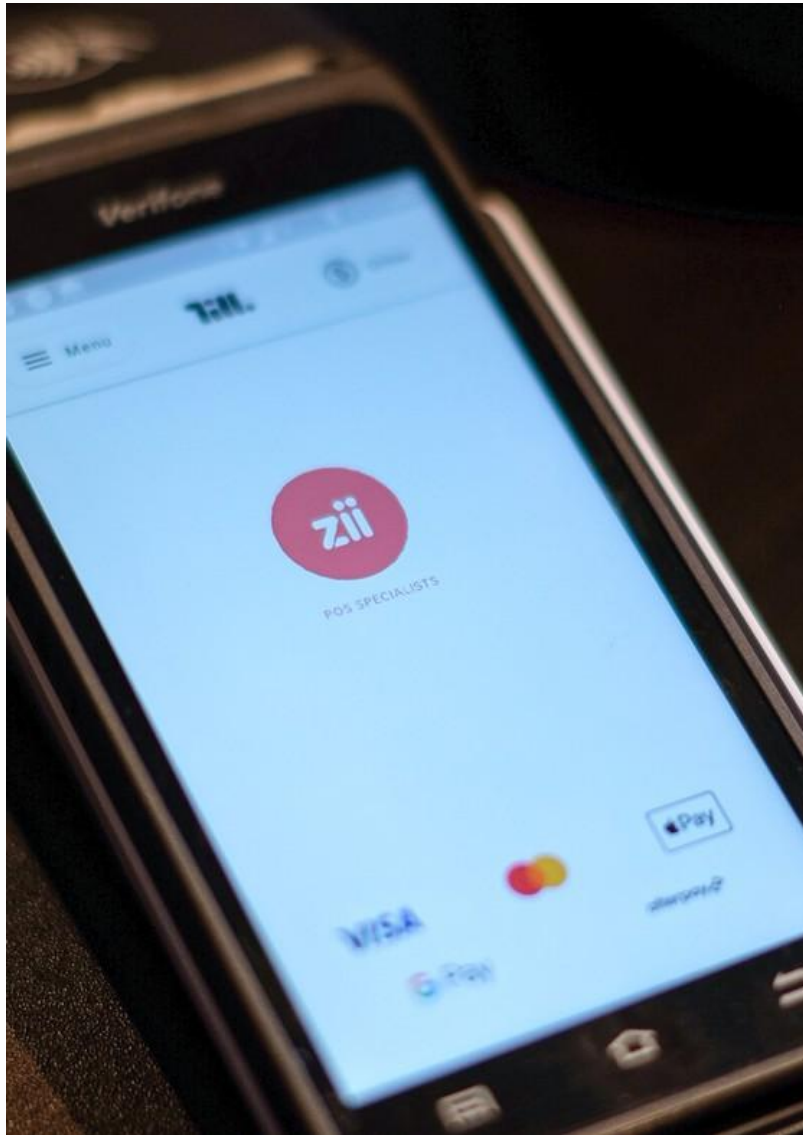

Android Solution

In a world where choice has become more prevalent, we are happy to deliver to the ever changing market an out of the box Android Solution. What we call Zii Go!

Not all two businesses are ever the same, and despite the digital world moving so fast, merchants have asked for a cost effective, simple solution.

Dual screens, embedded printer, what more could you ask for!

Payments

Processing payments with Zii has never been easier.
We integrate with Bangladesh's leading providers.

We have strong partnerships with SSLCommerz & UCB Bank to ensure payments are processed on time with the most competitive rates.
